

<b>Title</b>	<b>Chrome Extension- Links Collector</b>
<b>Description</b>	Develop a Chrome extension that collects all the links in a Webpage and shows them in a list in the extension, so the user can open/save any link.
<b>Group size</b>	3 – 4 members.
<b>Duration</b>	4 weeks.
<b>Deliverables</b>	A chrome extension that allows users to: <ol style="list-style-type: none"> <li>1. View a list of all URLs in the Webpage.</li> <li>2. Open a URL in a new tab when clicking on it.</li> <li>3. Save a URL to the bookmarks.</li> </ol>
<b>Bonus extensions</b>	Add the links with typing errors, like those that contain spaces, and homepage links without preceding “http://” or “www”,
<b>Mentor</b>	TA. Ahd Abd-Elrazek
<b>Notes</b>	<ul style="list-style-type: none"> <li>- You need to learn Java script and simple HTML.</li> <li>- Step-by-step tutorial for chrome extensions can be found here: <a href="https://developer.chrome.com/extensions/getstarted.html">https://developer.chrome.com/extensions/getstarted.html</a></li> </ul>
