

Title	Chrome Extension- Images collector
Description	<p>Have you ever experienced a moment when you wanted to download all images on a web-page instantly?</p> <p>Develop a Chrome extension that collects all images on a web page and shows them in a list in the extension so the user can select images and download them.</p>
Group size	3 – 4 members.
Duration	4 weeks.
Deliverables	<p>A chrome extension that allows users to:</p> <ol style="list-style-type: none"> 1. View a list of all images on the web page. 2. Open an image in a new tab on Click the image. 3. Download images. <p>The user is free to select the images to be downloaded:</p> <ul style="list-style-type: none"> • Add a checkbox beside each image to be selected. • Add a “Select all” button to select all images. • Add a “Download” button to download the selected images. <p>Display the number of images.</p>
Bonus extensions	<p>Enable the user to filter the images to be listed:</p> <ul style="list-style-type: none"> - The user can specify the minimum width and height of images
Mentor	TA. Ahd Abd-Elrazek
Notes	<ul style="list-style-type: none"> - You need to learn Java script and simple HTML. - Step-by-step tutorial for chrome extensions can be found here: https://developer.chrome.com/extensions/getstarted.html
