

Title	Linguistic Module
Description	- It's a part of a search engine which takes a list of words and removes all the stop words that are irrelevant to the search like (a, the, and...etc) and also change the plural words into singular.
Group size	3 – 4 members.
Duration	4 weeks.
Deliverables	1- A program that converts the input list of words into a list having no stop words, and converts the plural into singular.
Bonus extensions	- Any additional module which will help in searching will be bonus
Mentor	TA Sherif Haggag
Notes	- You have to check all the search engine list and you will understand more. - Check http://en.wikipedia.org/wiki/Web_search_engine for more info
