Data Structure Projects Student Guide

- 1- The duration every project is indicated in the project description.
- 2- All projects must be finished and evaluated by the week of the practical exams (23-27 December). So be sure to start your project early enough.
- 3- To book a project:
- Choose with your team one project from the list on:
 https://docs.google.com/folder/d/0B5qzptsdI3BgRFZreXljX25qUWM/edit?pli=1

 This list will continuously be updated by inserting new project ideas.
- If the idea is not clear enough in the project description, contact the mentor to get more explanation. The emails of all mentors are listed below.
- To book the idea, send an email to mahmoud.sakr@cis.asu.edu.eg and attach:
 - 1) Your names, 2) The project description file that you got from google docs, 3) One email address that will be used for correspondence.
- Wait for a confirmation email.
- Once you get the confirmation, start working.
- One week before the submission due date, contact Dr. Mahmoud Attia on mahmoud.sakr@cis.asu.edu.eg to schedule a date for the project evaluation.
- Prepare all the required project deliverables for the evaluation. All team members must attend the evaluation, as you will be individually evaluated. In the evaluation, you will need to demonstrate a live-run of your project.
- 4- You are responsible for booking your project on time. If you book the project late, you will still have to do the evaluation in the week of the practical exams.
