Title	Notifier
Description	This application is teacher's incomplete homework notifier that allows the teacher to notify parents that the child has not completed their homework. The app would work on three lists... a list of students, their parent's associated e-mail address, and a list of classes.
Group size	4 members.
Deliverables	An android application that works as follows:- • A drop-down menu with a list of classes that I have. After selecting the class I have, • A list of students with check boxes appears. I select the students that did not turn in their homework assignment today. • I then have another drop-down menu that contains custom made phrases like ...did not complete, did not hand in, etc. • Then I simply select send button and the parents are immediately notified. • The app. also should allow me to add **classes**, **students** (and their parents' e-mail) and **custom made phrases**.
Bonus extensions	- Sending SMS as well "No only e-mails".
Mentor	TA. Marwa Shams
