Title	Chrome Extension- Scheduler
Description	While browsing the internet, you find some interesting events to attend, read an e-mail from your manager telling you that there will be a meeting, or a friend tells you about an outing… Develop a chrome extension that you can schedule your events, meetings, and tasks.
Group size	3 – 4 members.
Duration	4 weeks.
Deliverables	A chrome extension that allows users to: 1. Add events by entering their info: Name, date, time, place, and type. 2. Display a different icon for each type of events. 3. View all scheduled events sorted by date/time. 4. Delete an event. 5. Edit event's info.
Bonus extensions	Display a notification before the coming event. User can specify when the notification should be displayed.
Mentor	TA. Ahd Abd-Elrazek
Notes	- You need to learn Java script and simple HTML. - Step-by-step tutorial for chrome extensions can be found here: https://developer.chrome.com/extensions/getstarted.html
